

Minerals Colour Collection

Colour :Colour is the first thing someone notices when they view a mineral. Color is also one of the big reasons that attract people to minerals. Generally speaking, color is not a good property to be used in the identification of minerals. It is usually the first property to confuse a novice collector into making an incorrect identification.

This collection contains 10 Minerals having Property of Green, Golden Yellow, Yellow, White, Red, Blue, Black, Grey, Purple& Transparent Colour.
